

Asset Tracking

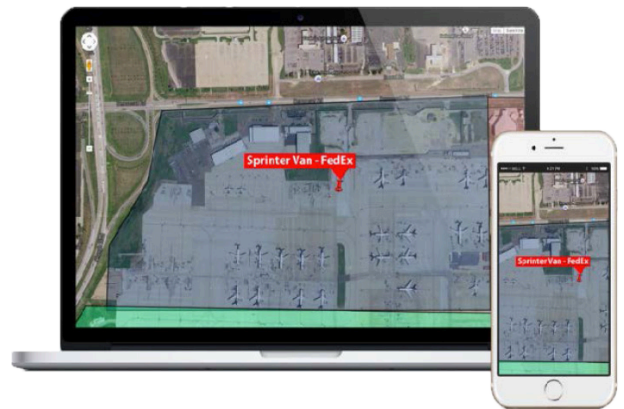

REAL-TIME VEHICLE LOCATION & DRIVER INFORMATION

OVERVIEW:

Nova Mobile Systems Asset & Vehicle Tracking Solution lets you view real-time location of vehicles, driver information and vehicle behavior with live tracking. Ideal for companies with service, delivery, sales and field teams as well as fleet vehicles. Key data points such as mileage, braking, distance traveled and hours of usage can be used to automate business processes and increase productivity to save time.

KEY HIGHLIGHTS:

Management can access daily reports, trip details and driver history to help them better manage their team and operations. The integration with our award winning platform allows tailored solutions to meet your unique business requirements; these custom actions and automations include assigning delivery, scheduling vehicle maintenance and checking in or out of an account.

FEATURES:
