Personal Tracking

REAL-TIME LOCATION OF FAMILY OR PERSONNEL

OVERVIEW:

When the safety of your family, staff or work personnel is at stake, especially in remote or dangerous regions, maintaining a reliable and consistent connection is essential. Nova’s Personal Tracking solution provides location tracking and real-time alerts when standard means of communication are not available. The lightweight, rugged device is able to withstand normal or extreme environmental conditions – making it easier to locate, track and communicate with elders, faculty and personnel, no matter where they are.

KEY DIFFERENTIATORS:

Real-Time Alerts

Stay up-to-date with real-time alerts of your assets location (date & time) straight to your smart phone.

Mobile App

Our personal tracking mobile app supports iOS, Android and Windows devices.

GPS Location Tracking

GPS location tracking provides real-time whereabouts of remote assets, family members or personnel.

Geofence

You can use the geofence function to record your personnels entry and exit time for a desired location.

S.O.S. Button

With the push of a button send real-time S.O.S. alerts to nearby managers indicating that the user needs assistance.

WiFi Positioning

Utilizes both GPS and WiFi connectivity to locate users both indoors and outdoors.

Message Store/Forward

When out of cellular range, the device stores up to 300 messages and will resend the stored messages once the device regains coverage.

Rugged Reliability

Our IP65 rated waterproof device is built to be sturdy and withstand the harshest work environments, creating a more reliable choice than our competitors.

Cellular Connectivity

Unlike other S.O.S. devices, Nova’s hardware for personnel tracking is cellular enabled and can be used anywhere in your area and beyond.

Personal Tracking

FEATURES, BENEFITS & APPLICATION OPTIONS

PERSONAL TRACKING APPLICATION:

Now available in the Google Play Store and the Apple App Store, Nova's Personal Tracking Application includes a full service GPS location tracking solution with real-time access to multiple enabled devices all in one place. Using the app you can locate a lost family member or employee with real-time alerts of their whereabouts. Geofencing gives further control by allowing specific perimeters to be set. Nova's personal tracking application simplifies life in the digital world, making it easy to stay connected to the people who matter the most.

PERSON TRACKING APP
REAL-TIME LOCATION

REMOTE WORKERS:

Remote workers need to have access to reliable two-way communication and S.O.S. Alerting. Those who are in charge of their safety need to be able to quickly locate their employees in case of an emergency.

Multiple Devices:

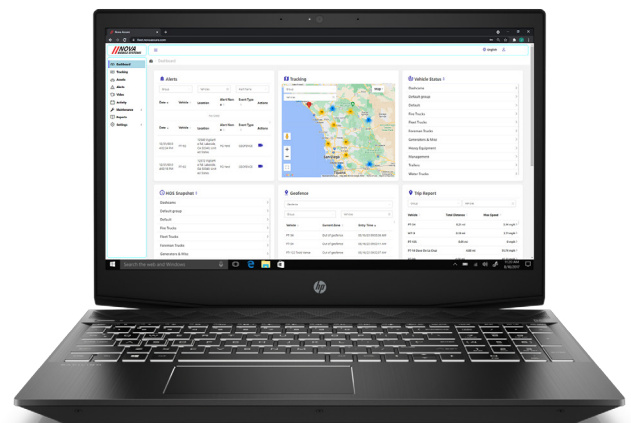

You can monitor an unlimited number of tracking devices in your account. For business tracking, you can even use the same account for all of your devices. In this way, all of your devices will then be managed on the same map.

GROUPING DEVICES:

You can group your devices in your account. Then you can view the location map by group, or allow other users to view your group of devices.

DEVICE REPORTING:

Gain access to real-time and historical reports of your personal tracking device's location, geofences entry/exit perimeters and overall mileage from specific days or times of device operation. This helps managers refine daily activity, maximize efficiency and monitor the performance of their employees.

Mini Battery Asset Tracker

NMS825 SPECIFICATION SHEET

OVERVIEW

A 4G LTE (Cat-M1 & NB) mini asset tracker. With real-time tracking, workforce personnel, faculty members or elders that need oversight can be located quickly and efficiently. Featuring a waterproof casing and compact design, this S.O.S. tracker is ideal for extended use in any environment. This device uses special algorithms for a long lasting battery charge and can be turned off / idle for a longer battery life with updates provided Over-The-Air. The NMS825 also utilizes GPS+WIFI+LBS, which offers improved location accuracy, while Cat-M1 and NB cellular capabilities keep data costs low. Geofencing capabilities are also available to ensure notifications are sent if the tracker leaves a predefined area.

Most importantly, the NMS825 provides real-time location and convenient tracking of the assets that matter the most. In addition, the S.O.S. panic alert allows users to send real-time alerts by the push of a button, providing another layer of security and assurance.

HIGHLIGHTS

- **Tracking:** Sends real-time location and speed information.
- **Mixed-Mode:** SMS mode, intelligent Mode (check speed/time/distance), deep sleep mode (battery).
- **WIFI Compatible / WIFI Positioning**
- **Message Store & Forward:** Up to 300 messages or alerts.
- **Cellular Enabled**
- **Deep Sleep Power Saving Mode**
- **Battery Low Warning**
- **OTA (Over the Air):** Configuration and firmware can be remotely upgraded.
- **Waterproof Case:** IP65 rated.
- **S.O.S. Emergency Panic Button**
