

## Remote Fuel & Fluid Tank Monitoring

### Real-Time Fluid Level Monitoring

The NMS Wireless Tank Monitoring Solution provides real-time fluid level measurements in multiple tanks, across multiple sites, all from your computer or smart phone. With real-time access to data you can reduce costs, improve efficiency and expand your customer base. Remote fuel monitoring allows you to keep close tabs of your on and off site fuel tanks without having to leave your office. The system assures real-time tank level notifications and reports. You can receive alerts and notifications when your fuel tanks are loaded or when the tank has reached its predetermined draw limit; helping you prevent costly billing errors and fraud attempts with precise tank level and activity data.

### Features:

- 24/7 level monitoring
- Inventory management
- Daily reports
- Low fuel warning / alerts

### Benefits:

- Multiple tank deployment
- Low cost / easy setup
- Reduced operational costs

### Key Highlights

Automate, Integrate and Innovate. Our technology is designed from the ground up and built to support the needs of your operations now and into the future with industry leading technologies.
