# NovaAssure

## The Award Wining Remote Asset Management Platform

We integrate IoT solutions to help your business innovate and build success. NovaAssure is a Cloud based platform that provides 24/7 access from any kind of smart device. This allows you to track real-time location and improve fleet management, remotely monitor ambient conditions and enhance asset management.

## Key Highlights

**The NovaAssure platform layout consists of a widget style format to make controling and managing your assets, fleet or vehicles as easy as possible. With the widget based format you can resize any of the featured inputs and even customize the dashboard to your company's needs.**
