

Recreational Food & Beverage Monitoring

A LOOK INTO THE FUTURE

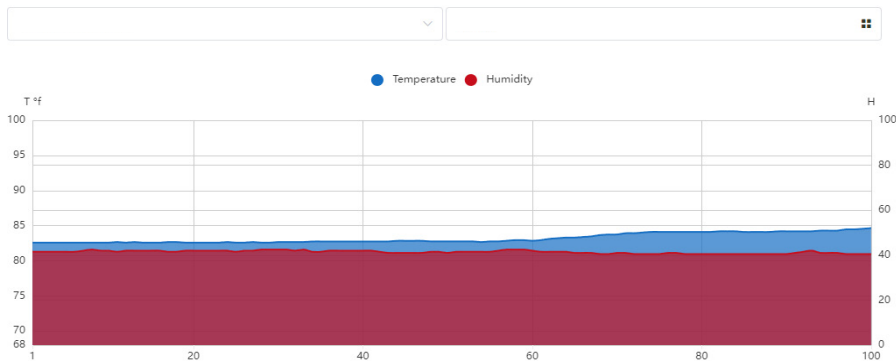

The Nova Real-Time Remote Temperature Monitoring for food & beverage offers wireless temperature readings through connected sensors, tracking temperatures in the field and in-transit. This assures compliance, and finest quality of food delivery and management while meeting regulatory compliance requirements. This allows real-time GPS location, alerts through Nova’s new mobile app, and dual

zone temperature monitoring. Top of the line hardware devices that are fully certified by all parties. The NovaAssure Platform allows you to view all assets/devices on one customizable, easy to use system. Capabilities to monitor temperature in a dual zone environment. Real-time alerts allow you to know when a temperature has exceeded your pre-set limits.

Temperature Comparison

Vehicle	Zone 1				Zone 2			
	Current	High	Low	Average	Current	High	Low	Average
Stein B1 MD VR T/H	93.02	93.92	32	91.29	32	52	0	35.9
