

## Remote Worksite Video Management

### A Look Into The Future

The Nova SeeAssure Worksite Video Management system is a plug and play video and environmental monitoring solution designed for indoor monitoring and alerting. With 1080p high definition cameras and dual Wi-Fi / 4G LTE Cellular connectivity for fallback, it has the highest quality and redundancy for safety + surety.

Integrated with the NovaAssure platform, SeeAssure provides real-time alerts for environmental disruption such as unexpected rise in temperature or humidity through connected sensors. The full SeeAssure system comes configured and ready to set up.

### Features

- Live stream monitoring of your facility from anywhere anytime
- Virtual alerts - cloud based alerts for environmental concerns (temperature / humidity). These can be sent to multiple persons at once and also have alerts sent to specific personnel according to the work schedule.
- Dual communications = 100% surety Wi-Fi and cellular
- Multi camera 1-4 standard and expandable to 8
- Standard device data storage for 60 days. Expandable to meet your needs.
- No power or batteries required for camera management.
- Fully functional in low light conditions

### Key Highlights

Automate, Integrate and Innovate. Our technology is designed from the ground up and built to support the needs of your operations now and into the future.

### General Use Cases

- Maintenance facilities
- Server rooms
- Critical entry / exit locations
- Hospitality vending and pool Areas
- Inventory areas
- Blind spot areas
- Stock rooms / restricted areas
- Government municipalities
