

Real-Time GPS Tracking

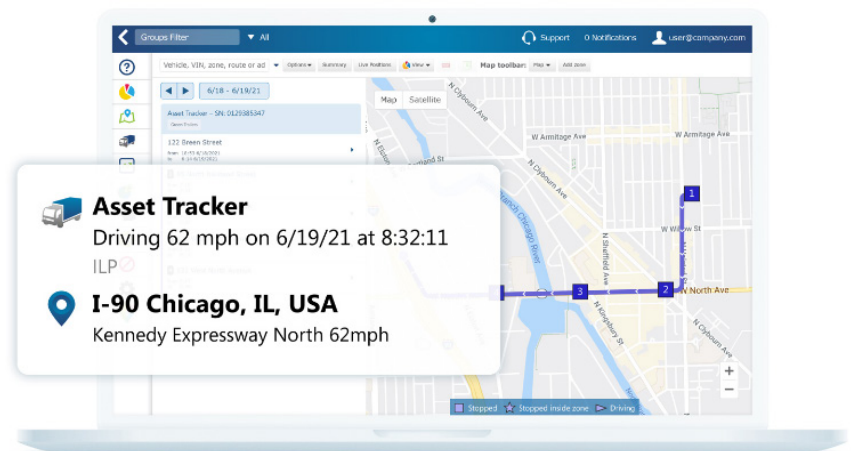

With the Nova / Geotab integrated portal you will be able to Monitor your valuable fleet assets when they're on or off the road with real-time GPS location tracking. Locate and recover equipment. Our asset trackers feature a ruggedized design and long lasting battery life, suitable for outdoor use and harsh weather. Enhance fleet asset management with deeper insights into how your assets are being used. Report on true asset utilization, down time, asset movements and yard entry and exit times. Integration with Geotab means that you can follow trends on asset usage and location directly from our portal.

Key Advantages

Unlike other systems, Nova's integrated efforts with Geotab allows you to easily monitor the status and condition of your assets remotely. Set up immediate alerts for entering or exiting a geofenced zone, operational efficiencies and movement change, impact, and other thresholds with advanced device management.

Key Device Features

- Rechargeable in the field
- Battery Level Reports & Alerts
- Daily Health Check
- 7 Power Modes for detailed Power Management

Instant Integration with Geotab's Customer Portal

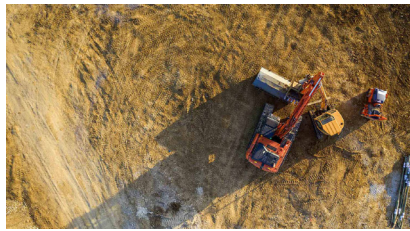

Beyond vehicles, businesses can use the Nova / Geotab integrated fleet and asset tracking portal to monitor the location and usage of other assets, such as heavy machinery, emergency response vehicles, Forklifts and warehouse vehicles, construction equipment and more.

Asset Management Use Cases

Know where your assets are when you need them and limit time spent looking for forgotten equipment and tools. GPS asset tracking is ideal for a wide range of assets and fleets in every industry:

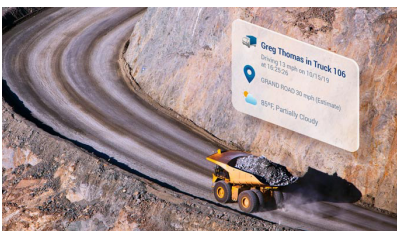

Transportation and logistics

Construction

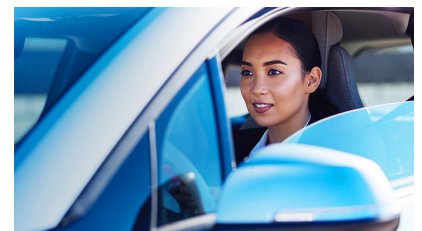

Food or pharmaceuticals

Oil, gas, and mining

Courier and delivery

Emergency first responders

Field services

Utilities

Recreational
