**GEOTAB**

## Technology that Goes Beyond.

Automate, Integrate and Innovate. Our technology is designed from the ground up and built to support the needs of your service personnel now and into the future.

In today's smart, connected world, our effective IoT solutions provide the accuracy of remote monitoring of service workers at multiple project sites simultaneously. With real-time visual and tracking alerts, project managers have visibility of every event that's happening on site. Automated GPS tracking and time stamp features, records entry and exits of workers, contractors and various project stakeholders at remote construction sites.

### SOLUTION FEATURES

Track staff movements, ensuring authorized personnel entering and exiting construction sites.

Automatic real time count of your workers at remote construction sites. Get alerts when your staff enter different zones.

Our system provides management real time visibility of workers, provides valuable reports for timed deliveries and decision making.

Increase productivity through efficient use of staff timing through automated alerts.

Valuable reporting and alerts allows project managers to manage safety and welfare of your employees and service workers.

### ADDITIONAL FEATURES

- Geofence
- WiFi Positioning
- Battery Low Warning
- Message Store/Forward
- IP65 Rated Waterproof

### OVERVIEW

A 4G LTE (Cat-M1 & NB) mini asset tracker. With real-time tracking, medical equipment or an asset that goes missing can be located quickly and efficiently. Featuring waterproof casing and a compact design, this tracker is ideal for extended use in any environment. This device uses special algorithms for a long lasting battery charge and can be turned off / idle for a longer battery life. The NMS825 also utilizes GPS+WIFI+LBS, which offers improved location accuracy, while Cat M1 and NB capabilities keep data costs low. Geofencing capabilities are also available to ensure notifications are sent if tracker leaves a predefined area.

Most importantly, the NMS825 provides real-time location and convenient tracking of the things that matter most. In addition, the S.O.S. panic alert allows users to send emergency alerts by voice response or the push of a button, providing another layer of security and assurance.

### FEATURES

- **Tracking:** Sends real-time location and speed information.
- **Mixed-Mode:** SMS mode, intelligent Mode (check speed/time/distance), deep sleep mode (battery).
- **Message Store & Forward:** Up to 300 messages or alerts.
- **WIFI Positioning**
- **Deep Sleep Power Saving Mode**
- **Battery Low Warning**
- **OTA (Over the Air):** Configuration and firmware can be remotely upgraded.
- **Waterproof Case:** IP65 rated.
- **S.O.S. Emergency Panic Button**

### BENEFITS

- Low Cost / Easy to Use
- Simple / Discreet Installation
- Geofencing Capabilities
- 24/7 Alerts
- Tracking From Anywhere
- Rugged Casing For Outdoors
